

MID-HUDSON RADIO CONTROL SOCIETY  
General Meeting Minutes

Date: 2/2/2009

Start time: 7:10 PM, at Poughkeepsie United Methodist Church

Members and Guests Present: 21

- Bill Swint showed off his winter project, an electric powered “Micro Telemaster”.
- Rich Rizza brought in a “Hawker Typhoon”, 18” wing span, from a Guillows kit purchased on eBay. It is being built for electric power with 3 channel control.
- Whitney talked about struts that he is making for his large scale aircraft project, including materials and techniques used.
- Warren went over some upcoming events for this month, including an auction sponsored by the NRCC club in Connecticut on Feb 8<sup>th</sup>, and the club “Frost Fly” to be held at the Hopewell field on Feb 14<sup>th</sup>.
- Warren mentioned that the club will be having a swap meet in conjunction with Dutchess RC Club, on March 21. More information will follow.
- Ron Revelle is putting together the club newsletter, and will send out shortly.
- Warren mentioned that we are all set with both fields for the upcoming flying season.
- Warren also mentioned that there is a group working on a possible new field. More information will follow when appropriate.
- Reminder for club applications to be sent in.
- Warren talked about a club “grievance” procedure and form that is being considered for the club to use. It is noted that similar clubs have a process in place for people to use. Further discussion and vote will be held when there is enough members present to vote upon.
- Warren led a modeling discussion some material that he is using to build some parts for his ¼ scale project. The material is called “G-10”, and was purchased through McMaster Carr Supplies. The main question is if the material and surrounding structure would hold sufficiently enough to pressures during use.

Meeting adjourned: 8:20 PM
